

Professional thinking and decision making with Parmenides EIDOS

EIDOS changes the way you think and act.

EIDOS as a Visual Reasoning Language enables more precise and more innovative forms of thinking and decision-making.

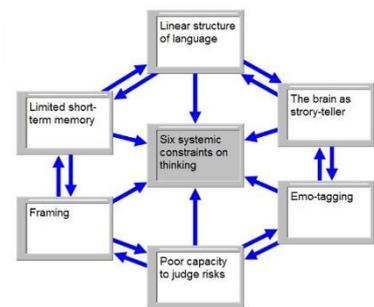

Complex thinking processes can now be de-aggregated into their individual steps and re-aggregated into highly transparent, interactively re-thinkable reasoning architectures.

Learn all about the four core elements of EIDOS and enhance your cognitive abilities by a factor of 10.

Module 1

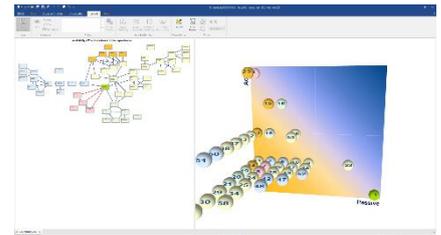

Learn about the scientific background of EIDOS, basics regarding the human way of thinking, and cognitive biases.

Introduction to handling the EIDOS framework. Get started with the first use case and work on Goal Assessment, one of the 4 core elements.

Module 2

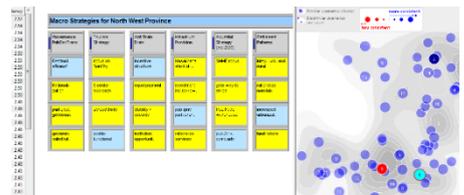

Learn the difference between “situation” and a “situation analysis” – no. 2 of the 4 core elements. De-aggregate the most complex challenges and find the most promising levers using the active-passiv-map.

Module 3

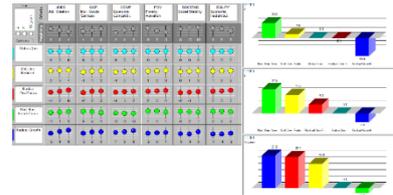

Based on the insights you got from the Situation Analysis, you apply the next core element: The Option Development.

Work out possible options to identify the most plausible scenarios to be prepared for future events and the VUCA world.

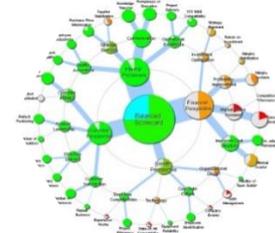

Module 4

After deciding on plausible scenarios, discover what scenarios and options are the best fit to reach your goals by applying the Option Evaluation, the last of the 4 core elements.

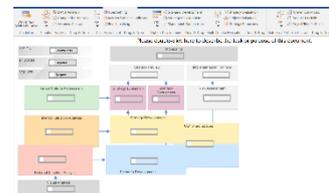

Module 5

Being familiar with the 4 core elements we start working on the next case study. On the way you get to know how to use the various tools for visualisation. Provide transparency and gain trust by making your thinking processes traceable.

Module 6

Learn about the Management Toolset, the different Decision Architectures and discover the multipurpose use of EIDOS.

Course structure – blended learning

- ✓ About 45 hours overall
- ✓ Live online sessions
- ✓ Webinars
- ✓ Use of case studies and real-life examples
